RAMANLAL SHAH**
MEMORIAL HOSPITAL

OUR APPEAL FOR FINANCIAL HELP

Respected Sir, / Madam,

We, the Trustees of Shri Jalaram Arogya Seva Trust manage the operations of a hospital to serve the poor people of Meghraj & surrounding 50 kms area of district of Panchmahal and Dungarpur-Rajasthan (Complete SC/ST Belt) with Specialties like Medicine, Surgery, Gynaecology, Paediatrics, Ophthalmology, Orthopaedic and Dental departments since last 24 years for the benefit of poor people of this tribal region. In Meghraj, and surrounding areas, poverty level is more than 75%. This area is a hilly region. The people are heavily dependent on monsoon, but the land being hilly, is not fertile. So, very little farming is being done here.

Currently we have about 250 to 300 patients visiting/benefitting our hospital daily but with new facility we expect to have more than 500 to 600 patients benefiting/visiting daily. The positive outcome is that the humanitarian services have been recognized in the nearby districts of Rajasthan too, including Meghraj and nearby Taluka of Aravalli and Panchmahal District of Gujarat. In new proposed facility we expect to serve more than 600 patients a day with facility of 300 beds.

The hospital has developed a concept of high level of health care. We treat below-the-poverty-level patients free of cost and middle-income-class patients at a very low and affordable cost. We provide free food to all admitted patient and one of their relatives. In ophthalmology department we provide a spectacle for Rs. 50/- to poor patients, free prescribed glasses to school going children and free cataract operations to all children & adults. We organize eye camp time to time and treat all patients free of cost. We gratefully acknowledge that Shri Pravinbhai Shah and his wife Jyotsnaben have played a major role in sponsoring eye camp every year. He has been the proven, major force in bringing free eye check-up for poor in our area.

We, the trustees of JAST, are very thankful to Shri Pravinbhai Shah Sir of New York, USA for his initiative and far-sighted vision for the future to provide more healthcare benefit to public at large of this region. After his personal visit to the hospital in 2020 he was impressed and moved by our work, and he has extended an offer to build a brand new, state-of-the-art hospital at the present site This generous gesture was welcomed with open arms and lots of gratitude and enthusiasm by all the trustees of JAST, as it is a dream come true for us. He has committed to be the major donor and will also influence his friends and family in raising new fund for our new hospital.

The plot of the land, required for the new premise, has already been acquired (purchased) which is just adjoining the existing hospital campus. We propose to add some more important departments in new hospital, such as Radiology (Sonography, X-Ray with C. R system, C T Scan, MRI & Mammography) Urology, Neurology, Basic Cancer Care Unit, Blood Bank, Dialysis, Physiotherapy etc. Also, with in the new building we propose to have Oxygen Concentration Plant and Solar Power Plant. All the new departments will have new Operation Theatres, new ambulances, ICCU on Wheels, Mobile Eye clinic, etc.

We are looking forward to donors/sponsors who are interested in sponsoring any or part of our project. If any donor or sponsor wishes to install a name-plate for their relatives or loved ones (name plates will have golden letters in black background, to make them easily visible) on equipment machinery or on walls of the wards, ambulances, computers for their sponsorship we would be happy to do it. All the donations or sponsorship will be tax deductible to Indian donors as well as Overseas donors.

We are very much thankful to Mr. Pravinbhai Shah(Native Ahmedabad, Settled in USA) for his initiative in helping us move towards realizing our dream for the new hospital. We have a long way to go, and we earnestly seek your help and generous donation/support and sponsorship.

Your valuable donations are being utilized for the best of patient's benefit. We seek your kind blessings to our trust for the noble humanitarian services to the poor, needy tribal people of this area and will encourage us for better services.

We ensure that your donation will surely be used for a right cause in the right way.

Exemption of Income Tax under Section 80 G is available in India and also available under FCRA (for Foreign Contribution).

We extend our hearty invitation to you to visit our hospital.

Sincerely yours,
With kind regards

Dr. Bansibhai Patel

WRITING A NEW CHAPTER IN HUMANITY & HEALTHCARE

SMT. SHARDABEN RAMANLAL SHAH MEMORIAL HOSPITAL

The existing hospital building was conceived and built twenty-five years ago taking into consideration the then envisaged present and future requirements. To cater to the requirements of the currently planned additional facilities and the need for future expansion it will be unavoidably necessary to carry out the wholesale changes, equivalent to building a new premises.

The regular maintenance and up-keep the existing premises also has been placing extremely increasing financial burden. The new additional building will, therefore, meet the physical requirements for the additional services with the latest equipment and is also financially more prudent and economical.

STATE OF THE ART TECHNOLOGY

In Terms Of Biomedical Equipments, Cutting-edge Diagnostic Centre, To Support The Trauma Centre.

IN HOUSE PATHOLOGY LABORATORY (Full-Fledged State Of The Art)
To Support Critical Care And Reduce Diagnosis Waiting- Time.

FULL-FLEDGED RADIOLOGY & IMAGING SERVICES
to provide accurate diagnosis with clinical correlation

CLASS 100 MODULAR OPERATION THEATRE

MINOR OPERATION THEATRE
To support added volume of minimally invasive surgeries

CLASS 1 LAC ICU (INTENSIVE CARE UNIT)
Managed through air handling units and HEPA filters, Following the world-class infection control protocols.

CENTRAL OXYGEN, MEDICAL AIR, SUCTION, ON EACH BED
In the entire hospital to cope up with any future pandemics or emergencies

WHO (WORLD HEALTH ORGANIZATION)
Patient safety standards

STATE OF THE ART KITCHEN
To cater organic food to patients
As per nutritionist care plan, and food to staff and patient relatives

HOSPITAL INFORMATION MANAGEMENT SYSTEM & DIGITALISED MEDICAL RECORDS
For optimizing patient flow, follow ups, government schemes, Care plans, diet, treatment, and more...

DIRTY CORRIDOR

To comply with NABH, JCI standards, the facility of separate dirty and sterile corridors helps reduce hospital-acquired infection.

OT PASSAGE

State-of-the-art operation theatre complex, at par with any other hospital globally, that would help with saving many more lives.

NICU

We need a bigger NICU (Level 3), with a separate Septic NICU for infectious newborn babies, Our current NICU is running at 120% capacity.

EMERGENCY WARD

24/7 26 bedded trauma centre with attached minor operation theatre, to save lives of tribals, in the 50 km radius region.

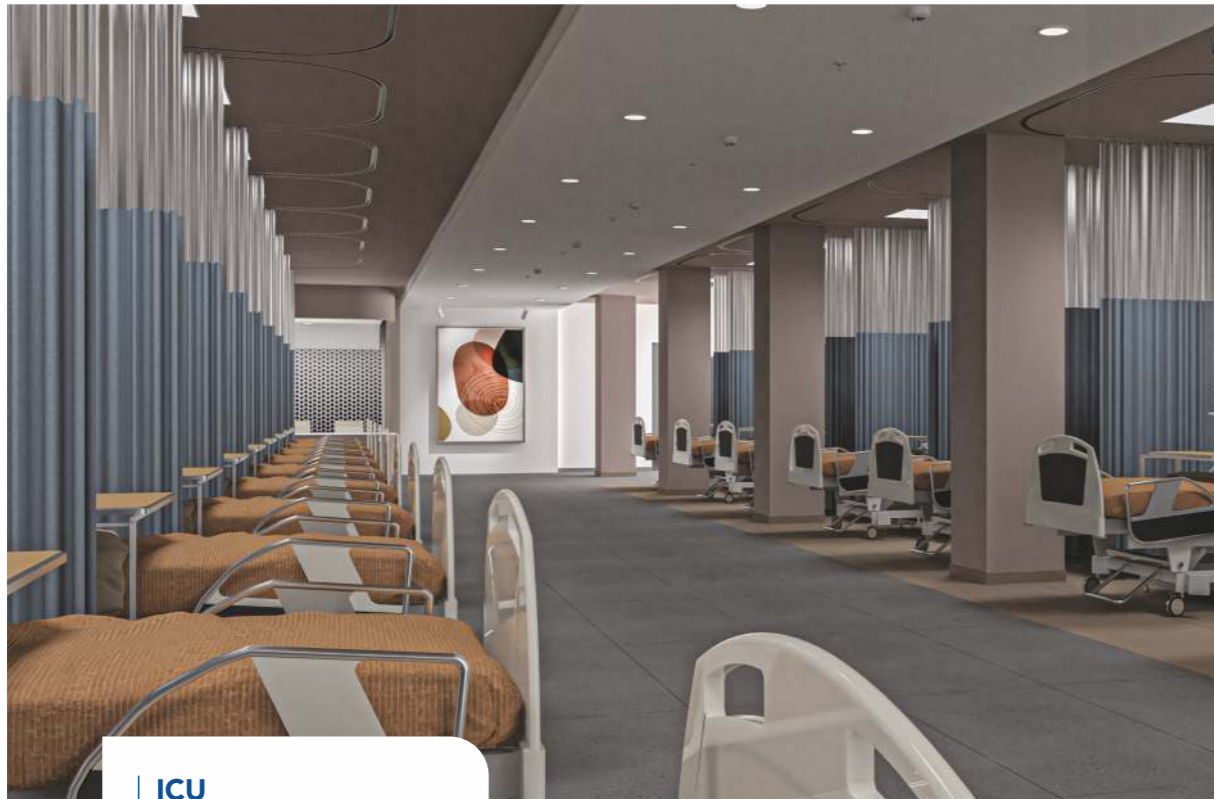

MOTHERS FEEDING ROOM

A 24/7 mother's stay area, and mother's feeding room, so they can be nearer to their newborn babies admitted in NICU, and can feed them.

RADIOLOGY PASSAGE

ICU

46 beds State-of-the-art ICU with separate isolation beds for surgical ICU

SEMI SPECIAL ROOM

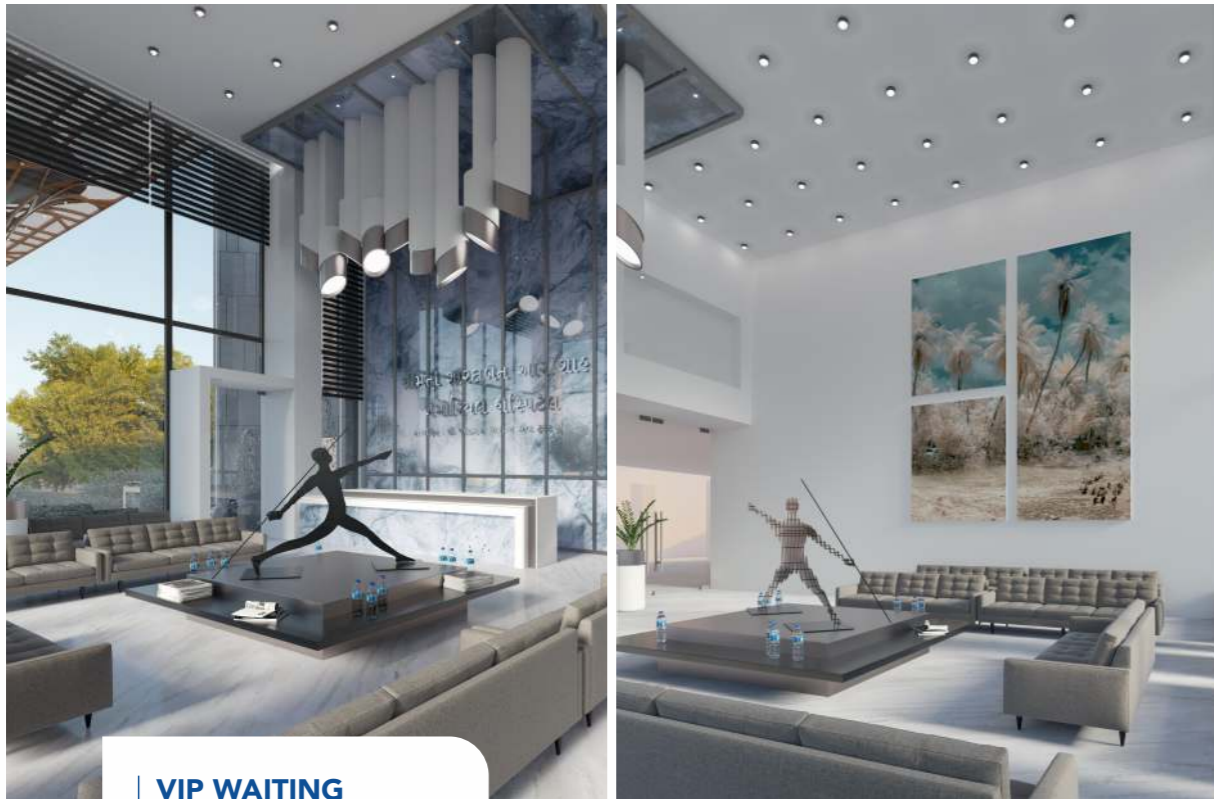

ZEN GARDEN

SPECIAL ROOM

Special rooms for VIP patients, or cash paying patients, which will help hospital with its running costs, and sustain the best quality standards of the hospital.

VIP WAITING

A separate VIP waiting for VIP patients, who can help hospital with its self sustaining model.

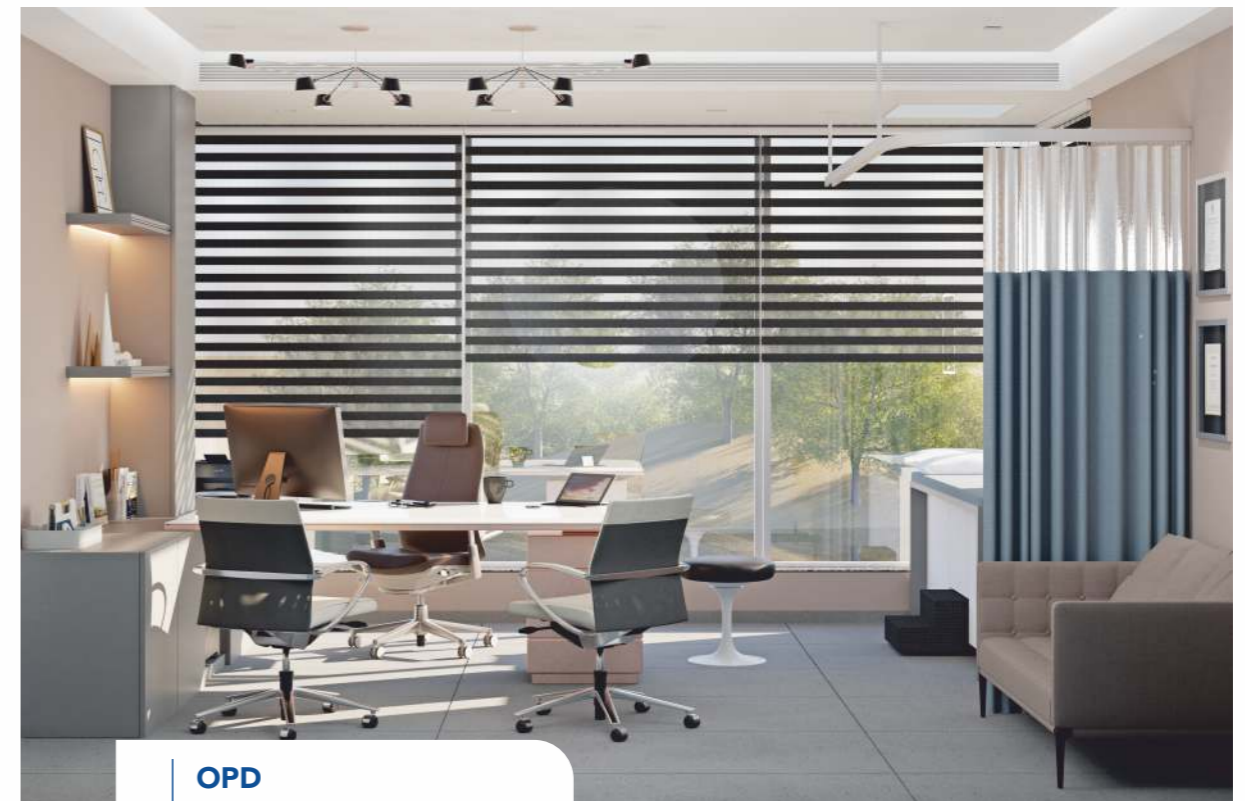

PASSAGE AREA

Hospital corridors with floor signages to guide patients to various departments faster.

GENERAL WAITING AREA

OPD

total 13 doctor's consultation rooms +
3 opthal and optometry rooms to cater multiple specialities.

PRAYER SPACE

PRAYER SPACE

A prayer space for people of all religions.

DORMITORY

24/7 dormitory for patient relatives, with attached shower and toilet facilities, available for a token amount of only 50 rs.

CORRIDOR

An administrative office with library, Medical records room, and space to run academic programs, to consistently deliver improved clinical results.
